Notes on Licensing Options

Products

Our main software line is available in three different flavors:

- PDFlib includes functions for generating PDF output. Note that PDFlib Lite, the open-source edition of PDFlib, supports only a subset of PDFlib features, and is not available for CPU-based licensing.
- PDFlib+PDI includes all PDFlib functions, plus the PDF Import Library (PDI) for including existing PDF pages in the generated output.
- The PDFlib Personalization Server (PPS) includes PDFlib+PDI, plus additional functions for automatically filling PDFlib blocks. PPS also includes the PDFlib Block Plugin for creating blocks interactively.

The documentation contains a detailed feature comparison. PDFlib, PDFlib+PDI, and PPS are distributed as a single binary package which is fully functional, but displays a demo stamp across all generated pages unless a valid license key is applied. According to your order the license key will activate PDFlib, PDFlib+PDI, or PPS.

CPU count

Licenses are based on the number of CPUs (processors), regardless of the number of computers on which the software is used. For example, two single-CPU computers as well as a dual-processor computer require two CPU licenses. CPUs are counted as reported by the operating system. Development machines which are not used for production purposes and run under the same operating system do not require a separate license. Redundant (backup) machines do not require a separate license provided they are never used concurrently with the actual production machines. For load-balancing servers a license is required for all CPUs in all computers.

Volume Discounts

Volume discounts are available for multiple licenses of the same product, provided all licenses are part of a single order:

- If 2 or more CPU licenses are ordered, 15% discount off the list price is granted for all CPU licenses.
- If 5 or more CPU licenses are ordered, 25% discount off the list price is granted for all CPU licenses.

Upgrades

An upgrade changes an existing license for a PDFlib 5 product to a license of a more advanced product. All CPU-based licenses can be upgraded at a reduced license fee. Upgrade discounts can be combined with volume discounts. The following table indicates the percentage of the list price that is due for various upgrade combinations:

to	From	
	PDFlib 5	PDFlib+PDI 5
PDFlib+PDI 5	50%	—
PDFlib Personalization Server (PPS) 5	75%	50%

Updates

An update changes an existing license to the corresponding license class of a newer version. All CPU-based licenses for PDFlib 3 and 4 can be updated to PDFlib 5 products at a reduced license fee. A valid license number must be supplied with all update orders. Maintenance updates (e.g., from version 5.0.2 to 5.0.3) are always free. Update discounts can be combined with volume discounts. The following table indicates the percentage of the list price that is due for various update combinations (please contact us for updates of PDFlib 3 or 4 runtime licenses):

to	From	
	PDFlib 3 or 4	PDFlib+PDI 4
PDFlib 5	25%	—
PDFlib+PDI 5	50%	25%
PDFlib Personalization Server (PPS) 5	75%	50%

Operating system platform

Supplying the name of the target operating system platform is a strict requirement since license keys are platform-specific. A separate price list is available for the IBM eServer iSeries and zSeries platforms.

Maintenance and support contracts

We offer several levels of support contracts which are only available in combination with a new product license, or to extend a previous support contract of the same level:

- Level 1 support includes 30 days installation support
- Level 2 support includes ongoing technical support for one year
- Level 3 support includes ongoing technical support for one year with short response times, plus access to all updates.

The following table summarizes support levels:

	Level 1	Level 2	Level 3
duration	30 days	1 year	1 year
support by	e-mail	e-mail	e-mail+phone
response time	5 days	3 days	1 day
minor updates	included	included	included
major updates	—	—	included
support fee as percent- age of the license fee	free	12%	18%

Premium licenses

In addition to CPU-based licenses we offer several extended licenses. These licenses do not include support or updates, but can be combined with Level 2 or Level 3 support:

	PDFlib Lite	PDFlib	PDFlib+PDI
single platform	n/a	US-\$ 10000	US-\$ 20000
multiple platforms	n/a	US-\$ 15000	US-\$ 25000
source code license	US-\$ 10000	US-\$ 20000	US-\$ 30000

Please contact premium@pdflib.com for more information about these license types, or PPS premium licensing.
